## **IPA** in The Independent

Writing in the UK's The Independent newspaper, Memphis Barker <u>discusses the rise of the evidence-based development movement</u>. Referencing Bill Gates' recent <u>op-ed</u> he says:

Gates writes in his op-ed of how,  $\hat{a} \in \text{coild}$  wave a wand, I'd love to have a way to measure how exposure to risks like disease and malnutrition impact children's potential  $\hat{a} \in \mathbb{D}$ . A wand is hardly necessary. IPA highlights how de-worming children in schools in Kenya, killing the parasites that steal the nutrients from their stomachs, reduces absenteeism by 25 per cent and leads to higher earnings in later life.
