COVID-19 Livelihoods Impact Tracking Survey

Researchers

[Shirley Jeffreys](#), [Bobby Berkowitz](#), [Jaco Wideman](#), [Michael dos Santos](#), [Grant Robertson](#)

Abstract

In response to the lack of data around the impact of COVID-19, FinMark Trust along with the insight2impact facility are looking to implement a short-to-medium term mobile tracking survey that measures behaviour, risk perceptions, belief in the efficacy of interventions, and experiences related to household adaption and social distancing of a sample of people weekly in at least seven African markets. This data can be used to monitor trends in mindsets, livelihoods and coping strategies of people as they try to manage the virus and its impact over time.
