The COVID-19 pandemic has severely affected employment and schooling for young people around the world, exacerbating existing gender inequalities and the particular risks faced by gift and women, before the pandemic, youngecomen were already less illed than their make pain to be employed or institute an large or islay to be exhaust in information precarbout forms of employment. Estimates show that an additional 11 million gifts may not return to chooling 2014 that the COVID-19 Series's Edderne from environ criess surrests that many will rever institute that the country of the cou

communications, and technology (iCT) educations (dirk have less access to mobile internet than their male peers. The support have wide redduring the pandenic, as ween and girls are more likely to be pulled out of school or leave the exortforce to conspend the for increased care and domestic work. Gain for eleturing to school may also lead to an increase in child marriages as a way to releave the miles from economic stress. Looddowns may also increase reases of programmy amongging due to descripted access to reproduct the healthnessers and calisances. Further evidence suggests that young people good using in times of crisis find ittended difficult to find pits and increme, delaying their path to find in powerly as they have less sand

In this brief, Innovations for Powerly Action has compiled evidence based insights from multiple meta-analyses and three-dozen rando-mized evaluations (both IFA and non-PA studies) on flow to support young extensis skill-budding and their transition into the labor force in love- and middle-income dounties, with a focus on the

From School to Employment: Effective Strategies to Support Women and Girls through the COVID-19 Crisis and Beyond

In this brief, Innovations for Poverty Action has compiled evidence-based insights from multiple meta-analyses and three-dozen randomized evaluations (both IPA and non-IPA studies) on how to support young women's skill-building and their transition into the labor force in low- and middle-income countries, with a focus on the COVID-19 crisis.
